## **PATRONAGE LETTER**

No. 004/S.Detiknas/III/2007

On behalf of the National ICT Council of Indonesia, or known as DETIKNAS, I would like to thank the Indonesian Infocom Society (MASTEL) and its members for their hard work in organizing the ICT2007 Indonesia Summit and TechnoConference.

Indonesia has followed closely the various steps taken by countries around the world in addressing the inevitable move towards a knowledge-based society. The Government of Indonesia believes the power of ICT in boosting economic, social and cultural development in attaining sustainable development and facilitating efforts to fight against poverty, promote equality and gender empowerment.

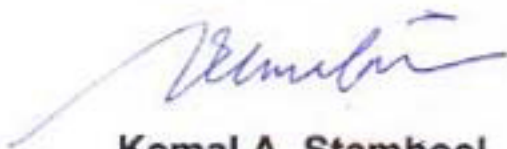

On this basis, immediate and concrete measures at all levels must be enacted to bridge the digital divide and develop digital opportunities, through making ICT an essential aspect of development in all sectors. For that reason, the National ICT Council was established in November 2006, directly lead by the President, to foster the ICT growth in Indonesia. Seven flagship programs have been selected with an aim; Palapa Ring, Government Software Legalization, E-Education, National Single Window, E-Procurement, E-Budgeting and Single Identity Number.

As part of our commitment to support the ICT industry in Indonesia, the National ICT Council appreciates and commit to patronage the ICT2007 Indonesia Summit as an event which directly supports the growth of the ICT industry in Indonesia.

From the exchange of knowledge and experiences within the ICT2007 Indonesia Summit participants should lead to applicable discuss on technology development, policy making, and ICT applications. We hope that ICT2007 Indonesia Summit will contribute in narrowing the digital divide in Indonesia through cooperation between industry and government.

I wish the success of the ICT2007 Indonesia Summit in Jakarta.

Thank you.

**Kemal A. Stamboel**

Vice Chairman Executive Team, National ICT Council
